See footnotes at end of table.

**TABLE S105. Incidence rates<sup>1</sup> for nonfatal occupational injuries and illnesses involving days away from work<sup>2</sup> per 10,000 full-time workers by part of body affected by the injury or illness and gender, State government 2010 — Continued**

| Part of body                 | Part of body code <sup>3</sup> | State government <sup>4</sup> | Gender |       |              |
|------------------------------|--------------------------------|-------------------------------|--------|-------|--------------|
|                              |                                |                               | Men    | Women | Not reported |
| <b>Nonclassifiable</b> ..... | 9999                           | 1.0                           | 1.1    | 0.9   | —            |

<sup>1</sup> Incidence rates represent the number of injuries and illnesses per 10,000 full-time workers and were calculated as:  $(N/EH) \times 20,000,000$  where

N = number of injuries and illnesses  
 EH = total hours worked by all employees during the calendar year

20,000,000 = base for 10,000 equivalent full-time workers (working 40 hours per week, 50 weeks per year)

<sup>2</sup> Days-away-from-work cases include those that resulted in days away

from work, some of which also included job transfer or restriction.

<sup>3</sup> Based on the Occupational Injury and Illness Classification System developed by the Bureau of Labor Statistics.

<sup>4</sup> Excludes farms with fewer than 11 employees.

<sup>5</sup> Data too small to be displayed.

NOTE: Dash indicates data do not meet publication guidelines. Because of rounding and data exclusion of nonclassifiable responses, data may not sum to the totals.
